

## Facilities Meeting

December 10, 2010

The following discussions took place at the meeting:

- Participants continued to discuss results from the Spring Patron Survey.
- Participants engaged in several activities and conversations to gauge their beliefs about facility priorities based upon the survey data.
- Based upon the participants present, there seems to be support for finding a way to address the following items: safety and security, ADA access challenges, and upgrades to educational spaces. Cost of these needs is recognized as a challenge.
- Participants gave input on topics upon which they would like more information. These topics will be used to plan a series of meetings beginning in January.
